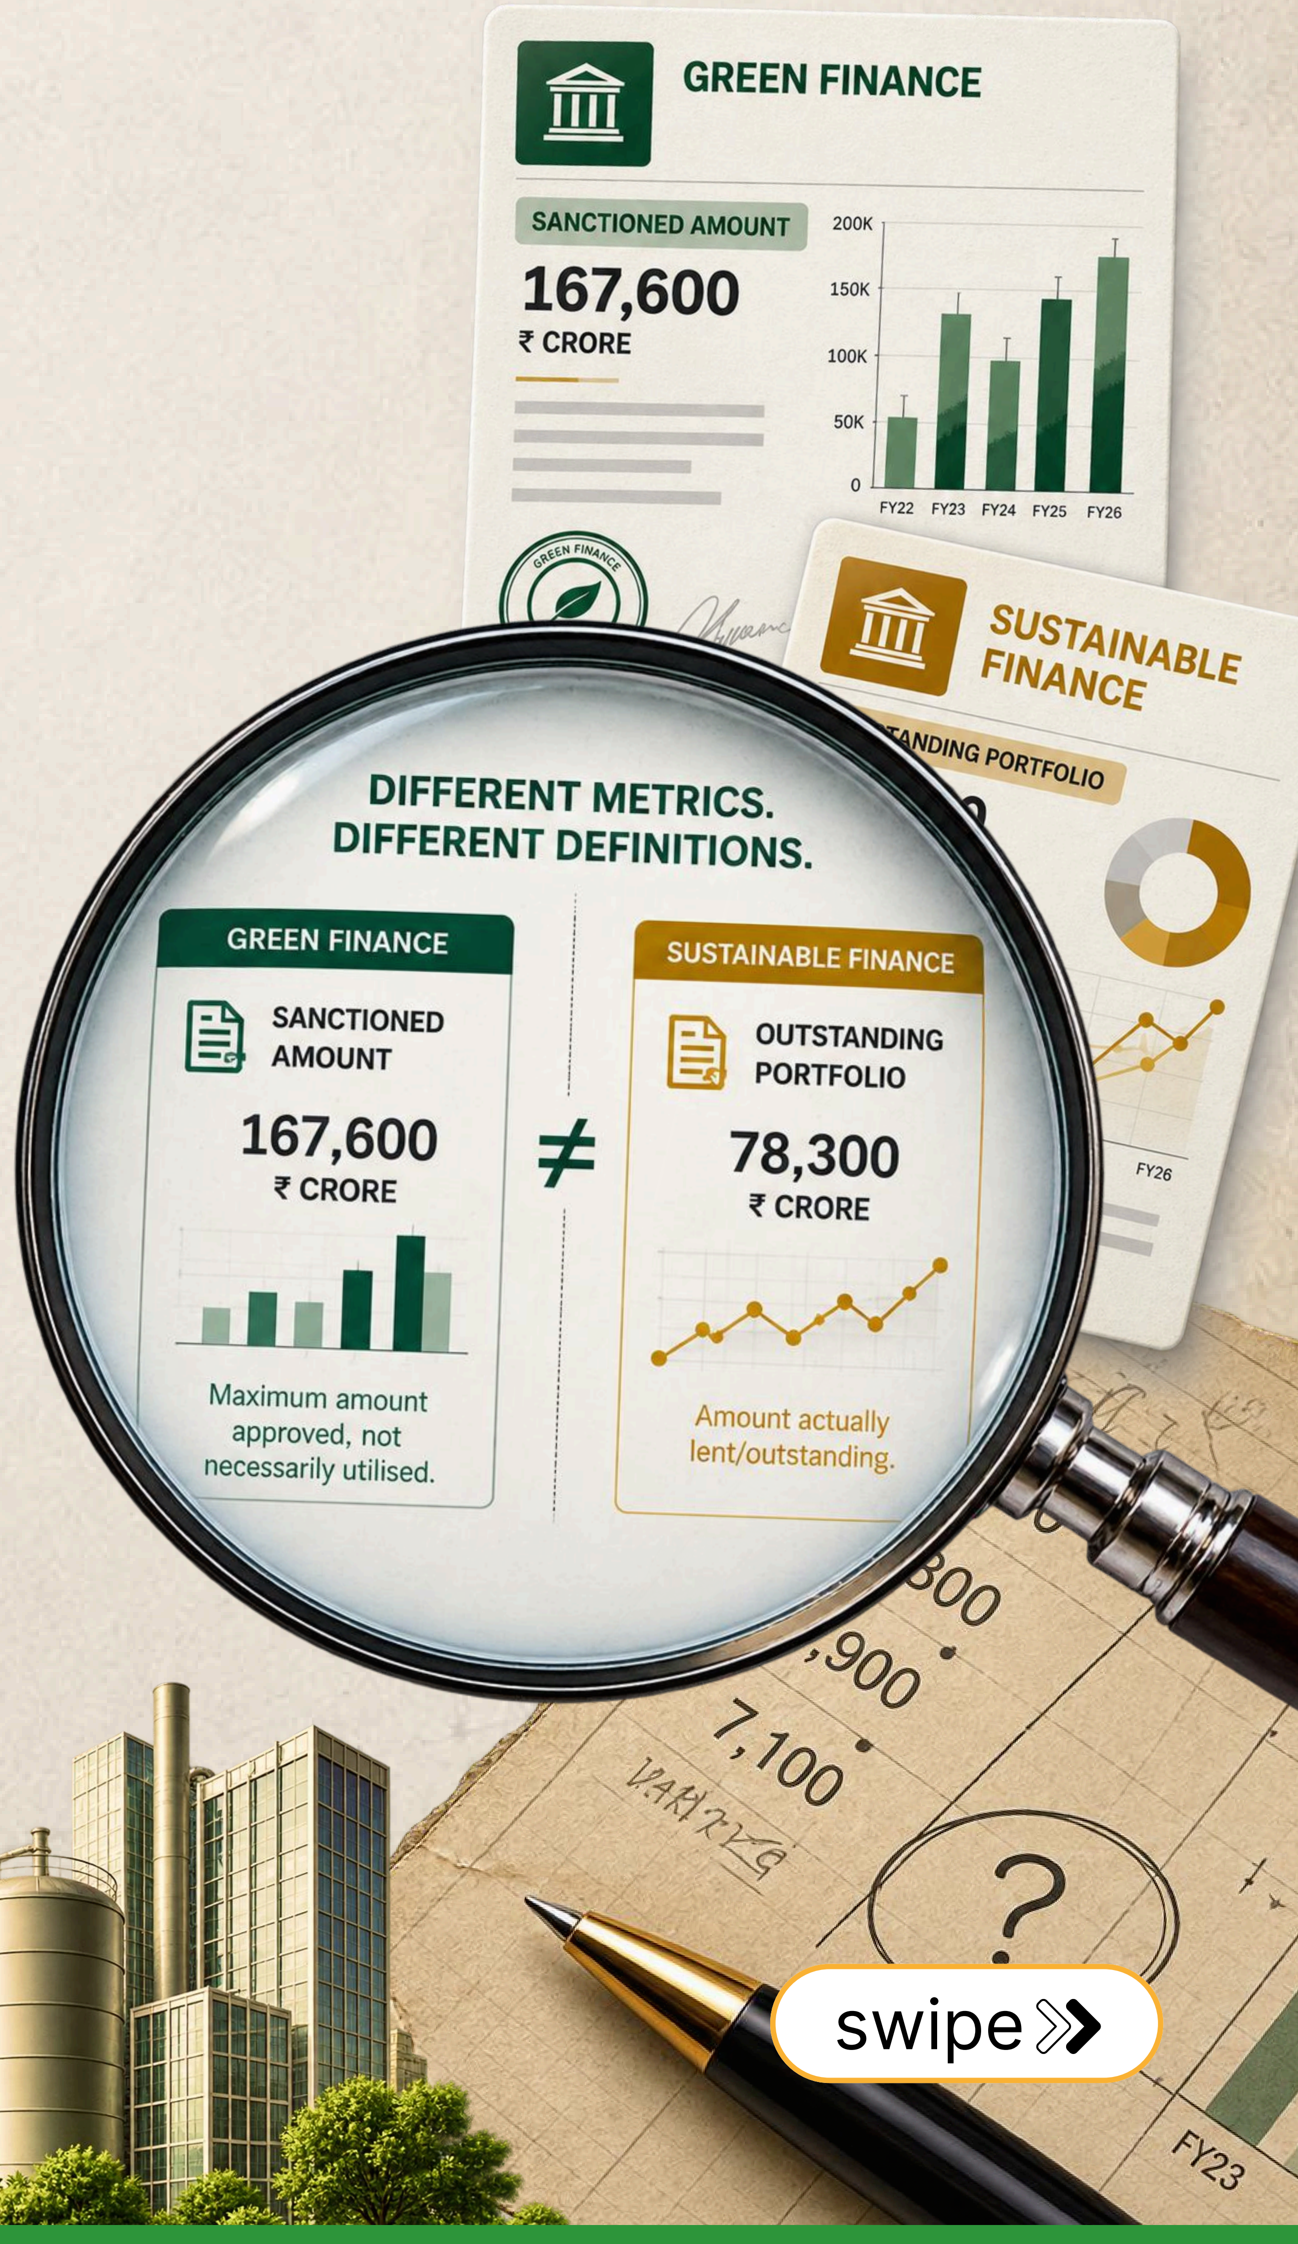
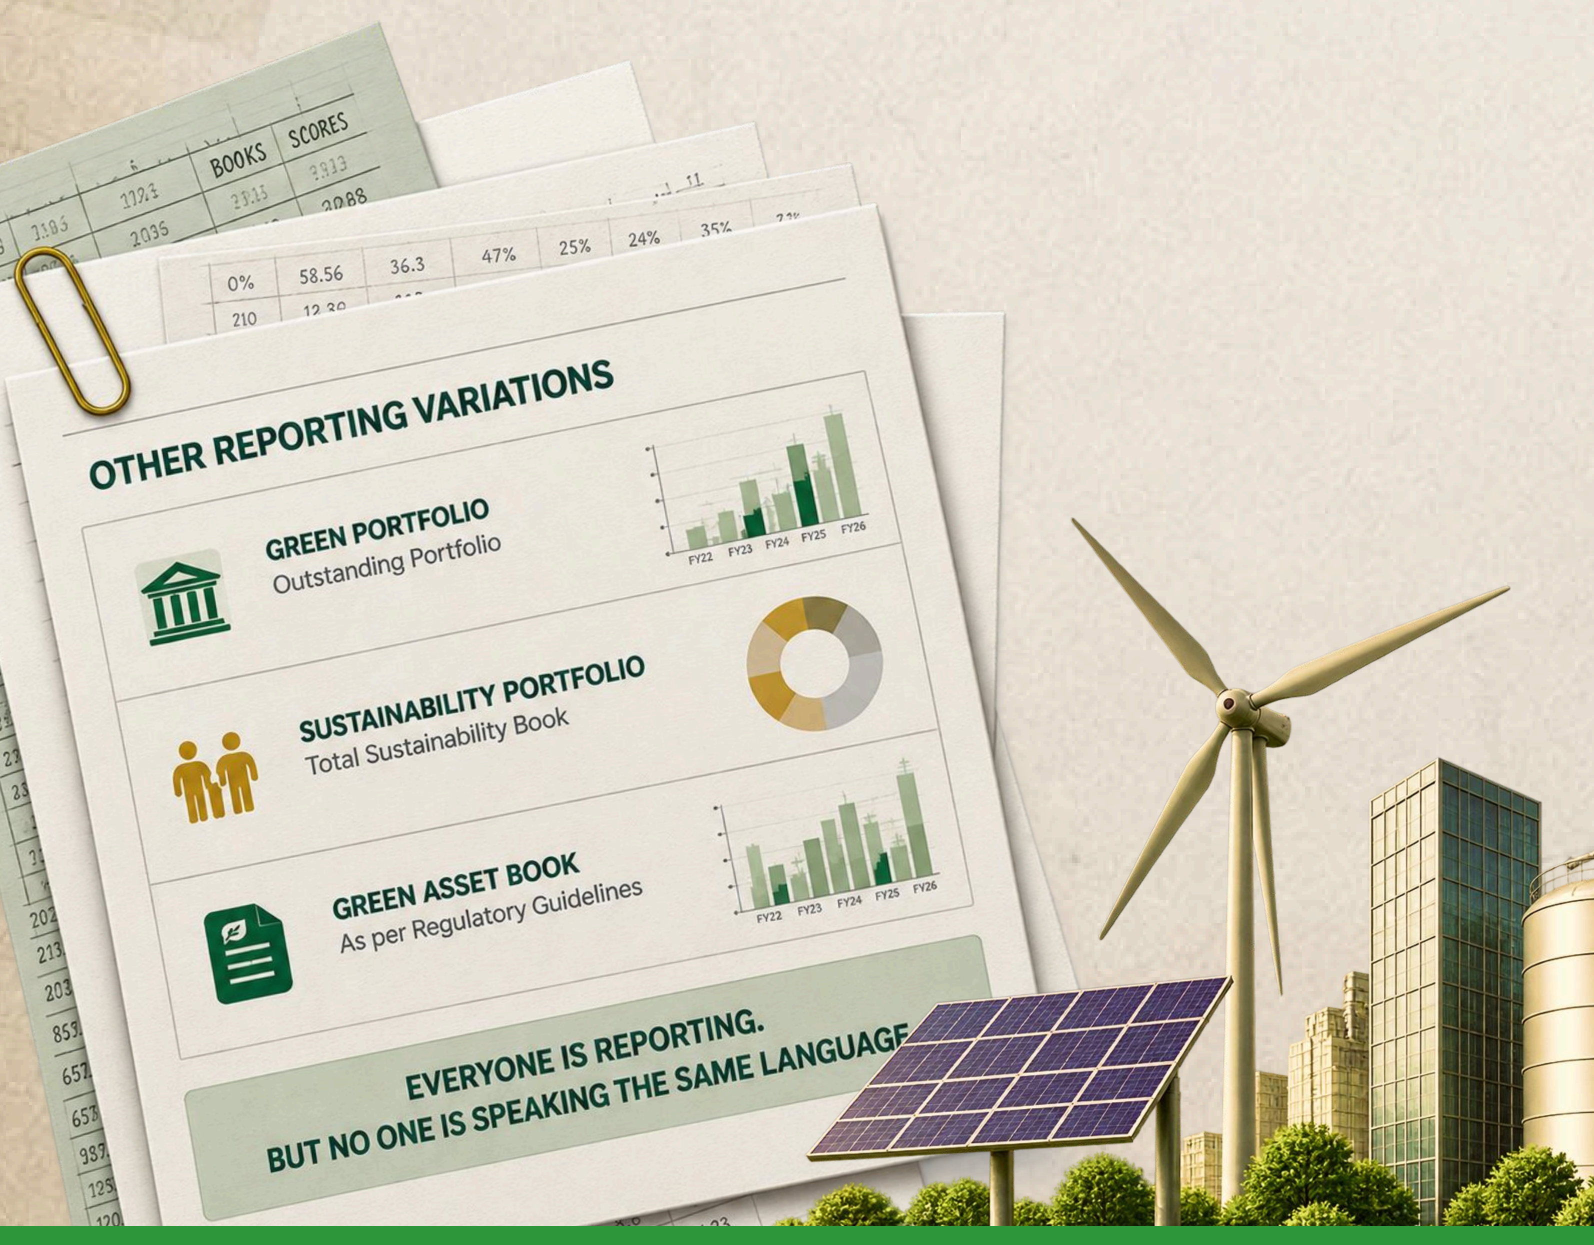
Climate and Sustainability Initiative

India's banks are reporting green finance.

So why can't we compare what they're reporting?

A closer look at India's climate finance reporting gap.

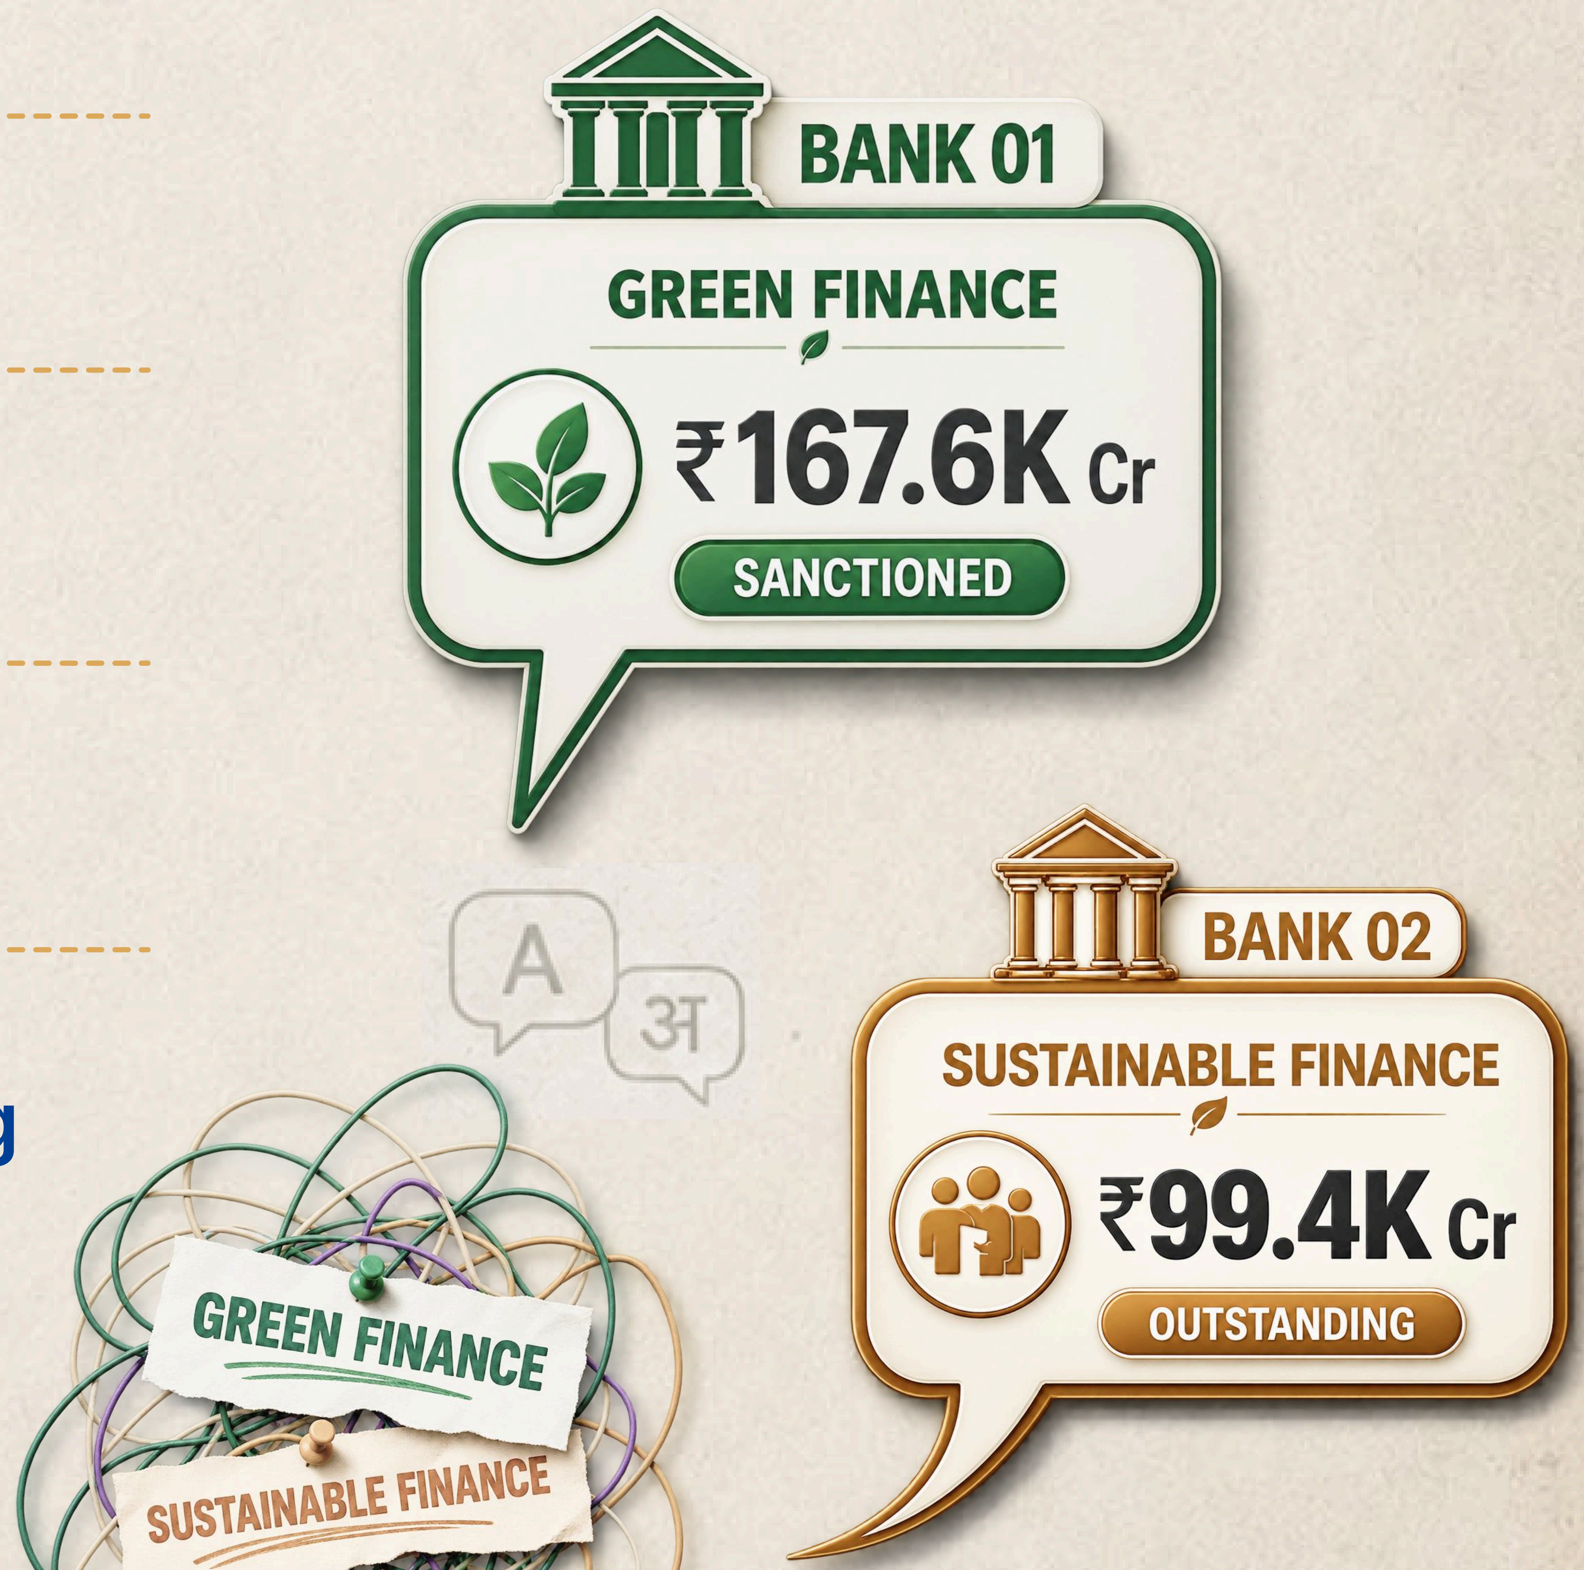




swipe

Here's the Problem:

- One bank reports **green finance.**
- Another reports **sustainable finance.**
- Some disclose **sanctioned amounts.**
- Others disclose **outstanding loans.**
- Everyone is reporting. **But no one is speaking the same language.**



swipe »

Why does this matter?

Because simple questions become difficult to answer.

- Which bank is financing more climate-friendly projects?
- Which sectors are receiving green capital?
- Is green finance actually increasing over time?

TODAY, THERE IS NO COMMON BASIS FOR COMPARISON.

What's missing?

A climate **FINANCE TAXONOMY.**
A common framework that defines:

01 What qualifies as **"GREEN"**

02 What banks should disclose

03 How climate finance should be measured

MANY COUNTRIES ALREADY HAVE ONE.
India's is still awaiting finalisation.

swipe

Measuring climate finance is just as important as mobilising it.

Without consistent disclosures, policymakers, regulators and investors cannot accurately track where climate capital is flowing.
