More than
A CRORE
HOUSEHOLDS
have registered for
PM Surya Ghar.

So why are
installations still
falling short?

Demand Isn't The Only Challenge.

Many households never make it from **application** to **installation**.

Why?

- Loan disbursements remain limited.
- Documentation requirements create hurdles.
- Many urban homes simply don't have suitable rooftops.

The blog argues that expanding rooftop solar requires more than subsidies.

It also requires financing and implementation systems designed around how people actually live and own property.

swipe >>

The next phase of India's rooftop solar story will depend on how we solve these structural bottlenecks.
